TRAINER & ASSESSOR GUIDE

Kaldrix Data Analysis Mastery Programme

Progress requires correct output, explanation, validation and independent reproduction. A submission alone is not mastery.

Recommended marking

Area	Weight	Evidence
Accuracy	35%	Correct calculations/queries/measures/code and reconciled totals.
Understanding	30%	Explains method, grain, keys, assumptions and limitations.
QA	20%	Uses control totals, exceptions, tests and source-to-output tracing.
Communication	15%	Clear findings, charts, documentation and decision relevance.

AI-use rule

AI is encouraged for learning, debugging, critique, alternative approaches, test generation and mock defense. It is not accepted as an unexplained answer generator.

Beginner mastery gate

Day 1 - Spreadsheet Anatomy & Data Types: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 2 - SUM, AVERAGE, MEDIAN, MIN, MAX & COUNT: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 3 - Percentages & Relative References: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 4 - IF Logic for Data Classification: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 5 - Sort, Filter & Conditional Formatting: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 6 - COUNTIF, SUMIF & AVERAGEIF: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 7 - Text Cleaning: TRIM, PROPER & Standardization: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 8 - Dates, Missing Values & Duplicates: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 9 - Charts & Evidence-Based Findings: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 10 - Beginner Capstone: One-Table Analysis: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Intermediate mastery gate

Day 11 - Absolute References, AND & OR: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 12 - COUNTIFS, SUMIFS & AVERAGEIFS: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 13 - VLOOKUP & Exact Matching: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 14 - XLOOKUP & IFERROR: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 15 - Cross-Sheet Reconciliation: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 16 - Pivot Tables: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 17 - Pivot Charts, Slicers & Interactive Views: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 18 - Data Quality Audit: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 19 - KPI Design & Business Questions: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 20 - Intermediate Capstone: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Advanced mastery gate

Day 21 - SQL SELECT, WHERE & ORDER BY: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 22 - SQL Aggregation & GROUP BY: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 23 - SQL JOINs: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 24 - SQL CTEs & Window Functions: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 25 - Power Query: Import & Transform: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 26 - Power BI Data Modeling: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 27 - DAX Measures & Filter Context: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 28 - Statistics for Analysts: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 29 - Dashboard Design & Data Storytelling: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 30 - Advanced Capstone: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Pro mastery gate

Day 31 - Python & pandas Foundations: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 32 - pandas Cleaning & Missing Data: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 33 - pandas Merge, GroupBy & Pivot: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 34 - Python Visualization: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 35 - Exploratory Data Analysis & Anomaly Detection: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 36 - Automation & Reproducible Reporting: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 37 - Experimentation & A/B Test Thinking: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 38 - Forecasting Fundamentals & Limits: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 39 - Governance, Privacy, Versioning & Documentation: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 40 - Pro Capstone: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Expert mastery gate

Day 41 - Analytical Problem Framing: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 42 - Multi-Source Architecture & Lineage: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 43 - Metric Layer & Semantic Consistency: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 44 - Causal Reasoning & Decision Risk: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 45 - Executive Communication & Analytical Narrative: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 46 - Model QA, Audit & Reconciliation: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 47 - AI-Assisted Analytics Workflow: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 48 - Live Change Request & Regression Testing: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 49 - Stakeholder Defense & Technical Review: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.

Day 50 - Final Expert Capstone: Ask the learner to trace one result to the source, explain the logic, show a QA check, and state a limitation.
